

Dedicated Internet Access (DIA)

A Reliable Connection

Reliable Internet access plays a vital role in your organization's operation. Whether you need a primary Internet service provider or a back-up provider, Manitoba Hydro Telecom (MHT) has the solution. MHT leverages Manitoba Hydro's extensive fibre network throughout the province to serve organizations in the public and private sector, as well as other Internet service providers.

Service Features

We are continually upgrading our network to serve more locations, increase service offerings, and meet our customers' growing bandwidth needs.

We offer:

- Bandwidth 50 Mbps – 10 Gbps;
- Symmetrical bandwidth;
- Low latency;
- Unmetered monthly usage;
- 24/7/365 SLA backed uptime.

Contact us to learn about bundling your Internet with other MHT services for a comprehensive solution.

Network Location

Dedicated Internet access is available throughout the Manitoba Hydro fibre network, with many Manitoba locations serviced on-net. We can build to other locations or provide service through partners for a comprehensive network solution.

Visit mht.mb.ca/map to view the MHT interactive network map. Contact us to discover if your location is on-net.

Technology

- Fibre-optic backbone;
- Protected Ethernet network architecture;
- 24/7/365 continuous monitoring;
- Industry leading systems hardware;
- Customer physical interface options:
 - Fibre;
 - Copper;
 - 100 Mb / 1Gig / 10 Gig.
- BGP peering available;
- IPv4 addresses available.

Support

- Service technicians located throughout Manitoba;
- 24/7/365 Network Operations Centre (NOC) support.
